MARELLI

checkstar
SERVICE NETWORK

Spazzole tergicristallo, Wiper blades, Wischerblätter
Balais d'essuie-glace, Escobillas limpiaparabrisas,
Escovas de limpa-vidros, βούρτσες υαλοκαθαριστήρα,
Pióra wycieraczek, Щетки стеклоочистителя, Ön cam silcekleri

Oferowane przez Magneti Marelli pióra wykonane są z wysokiej jakości materiałów i komponentów. Efektem tego są ich niepowtarzalne właściwości użytkowe.

Guma wycieraczki wykonana jest z mieszanki opartej wyłącznie na **kauczuku naturalnym** oraz innych komponentach chemicznych **z dodatkiem grafitu**, który pozytywnie wpływa na współczynnik tarcia oraz niweluje głośną pracę wycieraczek. Grafit dodawany jest w czasie przygotowywania mieszanki, co powoduje, że nie osadza się on na szybie w przeciwieństwie do wycieraczek, które są jedynie grafitowane.

- **100% kauczuku naturalnego**
- **Z dodatkiem grafitu**
- **Boczne listwy sprężyste wykonane ze stali kwasoodpornej**
- **Elementy metalowe wykonane z blachy stalowej o podwyższonej odporności pokryte aluminiowo-cynkową powłoką antykorozyjną**
- **Elementy z tworzywa PBT (politereftalan butylu) o wysokiej odporności na warunki atmosferyczne oraz doskonałych właściwościach**
- **Pokrycie farbą z zawartością żywicy poliestrowej odpornej na promienie UV oraz niekorzystne warunki atmosferyczne**

Offered by Magneti Marelli wiper blades are made of high quality materials and components.

Blades' rubber is made of a mixture based on natural rubber and other chemical components with a graphite particle, which positively affects on the friction and eliminates noisy wipers work. The graphite is added during the mixture preparation, as result it is not embed on the glass, opposed to the blades, which are only graphitized.

- **100% natural rubber**
- **With graphite**
- **Elastic strips are made of acid-proof steel**
- **Metal elements made of steel with high resistance alu-zinc and anti-corrosion coating**
- **Elements made of PBT material are high resistance to weather condition**
- **Coated by paint with content of polyester resin, UV resistant and weatherproof**

Стеклоочистители Magneti Marelli изготовлены из высококачественных материалов и компонентов.

Резиновая часть стеклоочистителей изготовлена из смеси на основе натурального каучука с добавлением графита, который улучшает коэффициент трения и противодействует шумной работе щетки. Графит применяется на этапе подготовки смеси, это способствует тому, что графит не оседает на стекле, что часто случается в стеклоочистителях, где производится только поверхностное покрытие.

- **100% натуральный каучук**
- **С добавлением графита**
- **Боковые планки изготовлены из высокопрочной стали**
- **Металлические элементы изготовлены из высокопрочной стали с алюминиево-цинковым покрытием**
- **Пластмассовые элементы изготавливаются с политерефталата бутила - технического материала с высокой устойчивостью к воздействию атмосферных условий**
- **Покрытие - краска с содержанием полиэфирной смолы, с высокой устойчивостью к воздействию ультрафиолетового излучения**

100% KAUCZUKU NATURALNEGO
100% NATURAL RUBBER
