

Microprocessor Controlled Smart Battery Charger / Maintainer BaTExpert 100 MM 007950007100

1. With industry leading feature sets

- **Aesthetic appearance** to attract end users with a user friendly LCD display and label design.
- **Multiple functions** to meet every user's needs with multiple power supply modes & multi construction/LFP battery types)

1. With industry leading feature sets

-**Advance technology** to charge a battery more effectivity. Such as low-temperature compensation, Repair mode and simple judgment function, etc.

-The low ripple power supply function doesn't interference the car ECU.

- **Safety designs** with Microprocessor controlled 9-stage charging algorithm, IP65 enclosures, Over-charge, Over-voltage, Spark free, Reverse polarity protection, Full insulation Clamp, etc.
2. Extensive range of high quality chargers- Family look to offer a complete AE offering

12V SINGLE BANK 1.5 / 10 Amp Battery Charger / Maintainer

Full insulation Clamps

Ring terminal

Cigarette plug (Optional)

Model Number	BT100
Display	LCD
Button	Two (mode & type)
Insulation case	IP65
Dimension	210 x 98 x 60 mm
Weight	880 g
Package	Color box package

Model Number	BaTExpert 100
Charging Current (Max)	1.5 Amp : 2.3Ah – 30Ah ; 10 Amp: 30Ah –200Ah (Switchable)
Voltage AC	220~240V, 50/60Hz
Applicate battery	<ul style="list-style-type: none"> • 12V Start-stop EFB, Start-stop AGM, WET, MF, Ca/Ca, AGM and GEL lead-acid batteries • 12V LiFePO₄ starting battery
Low starting voltage	2V for Lead-acid battery ; 10V for LFP battery
Charging algorithm	9 stages for Flooded/AGM/GEL lead-acid battery 6 stages for LiFePO4 battery (Charging curve design for customer's requirement)
Operation Temperature	-20~50°C , output power is reduced automatically at high temperatures
Power Supply	Yes (Data savor function)
Temperature Compensation	Automatic (Built-in temperature sensor)

■All in one, 12V charging mode:

- Workable with all lead-acid batteries(including Start-stop EFB, Start-stop AGM, WET, MF, Ca/Ca, AGM and GEL) and LFP batteries.
- 1.5 & 10 Amp switchable for battery ranging from 2.3AH to 200AH (motorcycle to HD batteries)

■Power supply mode:

- without losing important configurations! It will be a good helper when replacing a battery!!
- A good helper to be deployed in car show rooms, too.

■Save deeply discharged battery

- Newly developed Battery Repair mode can repair BAD capacity storage battery automatically!
- When the battery is at low voltage level, such when you forget turning off headlights, it can recharge the deeply discharged battery as low as 2V.

■ Save Energy & Time

- Unique charging diagram: 30% energy and 50% time saving

■ Fully Charged with Automatically Temperature compensation

- Without any manual setting. Temperature Sensor can detect automatically make sure battery can be charged effectively and fully regardless high or low temperature.

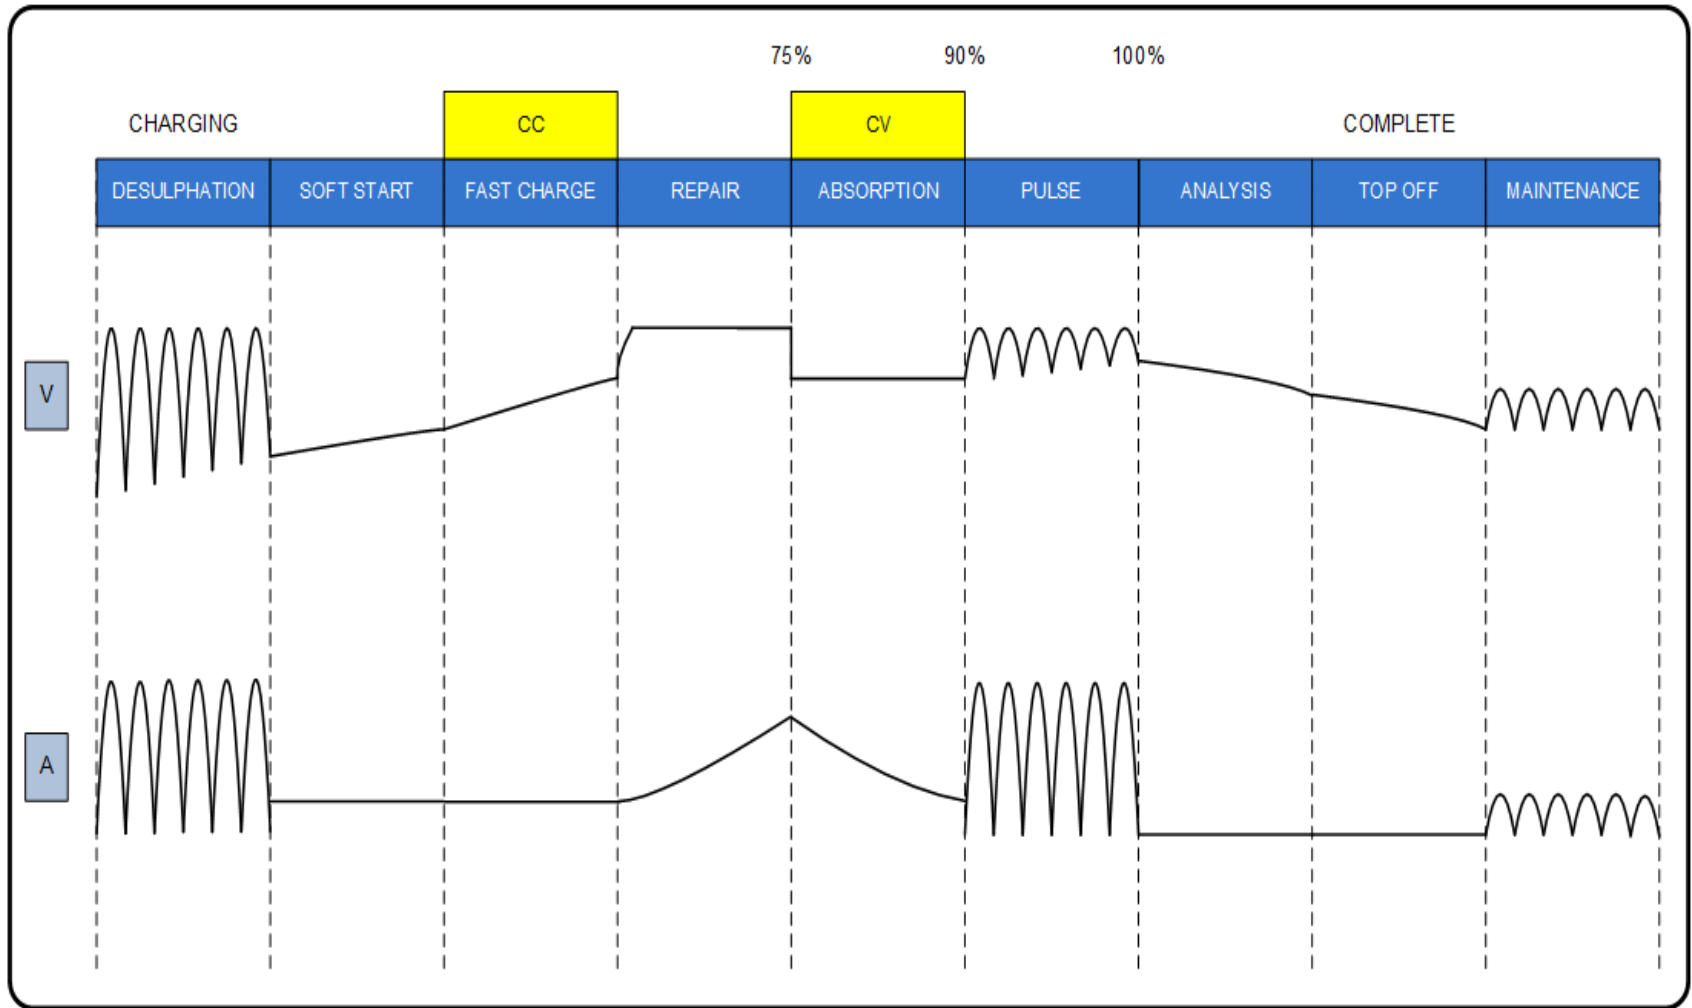

■ User-friendly Design

- Easy-to-read LCD user interface: Fully automatic charging/maintaining.

■ Safe & Reliable

- Multiple protection design
 - ✓ Over-charging protection
 - ✓ Spark free
 - ✓ Reverse polarity protection
- **IP65** classified protection: Dust and water resistant
- Optimizes battery performance & longevity

BaTExpert 100 Innovative Charging Diagram (1/3)

Smart use, fully charge, and better care

BaTExpert 100

Innovative Charging Diagram (2/3)

- **BaTExpert 100 is a fully automatic smart charger.**

The microprocessor will charge/maintain a battery with the optimal setup:

- **Desulfation**: Saves a deeply discharged or a lightly sulfated battery for recovery.
- **Soft start**: Tests that the battery is in suitable condition to receive a charge.
- **Fast Charge**: Charges battery to 75% in the fastest and most efficient manner.
- **Repair**: If the charged battery's charge storage capability is weak, it will detect and start the Repair function to recover battery automatically.

BaTExpert 100

Innovative Charging Diagram (3/3)

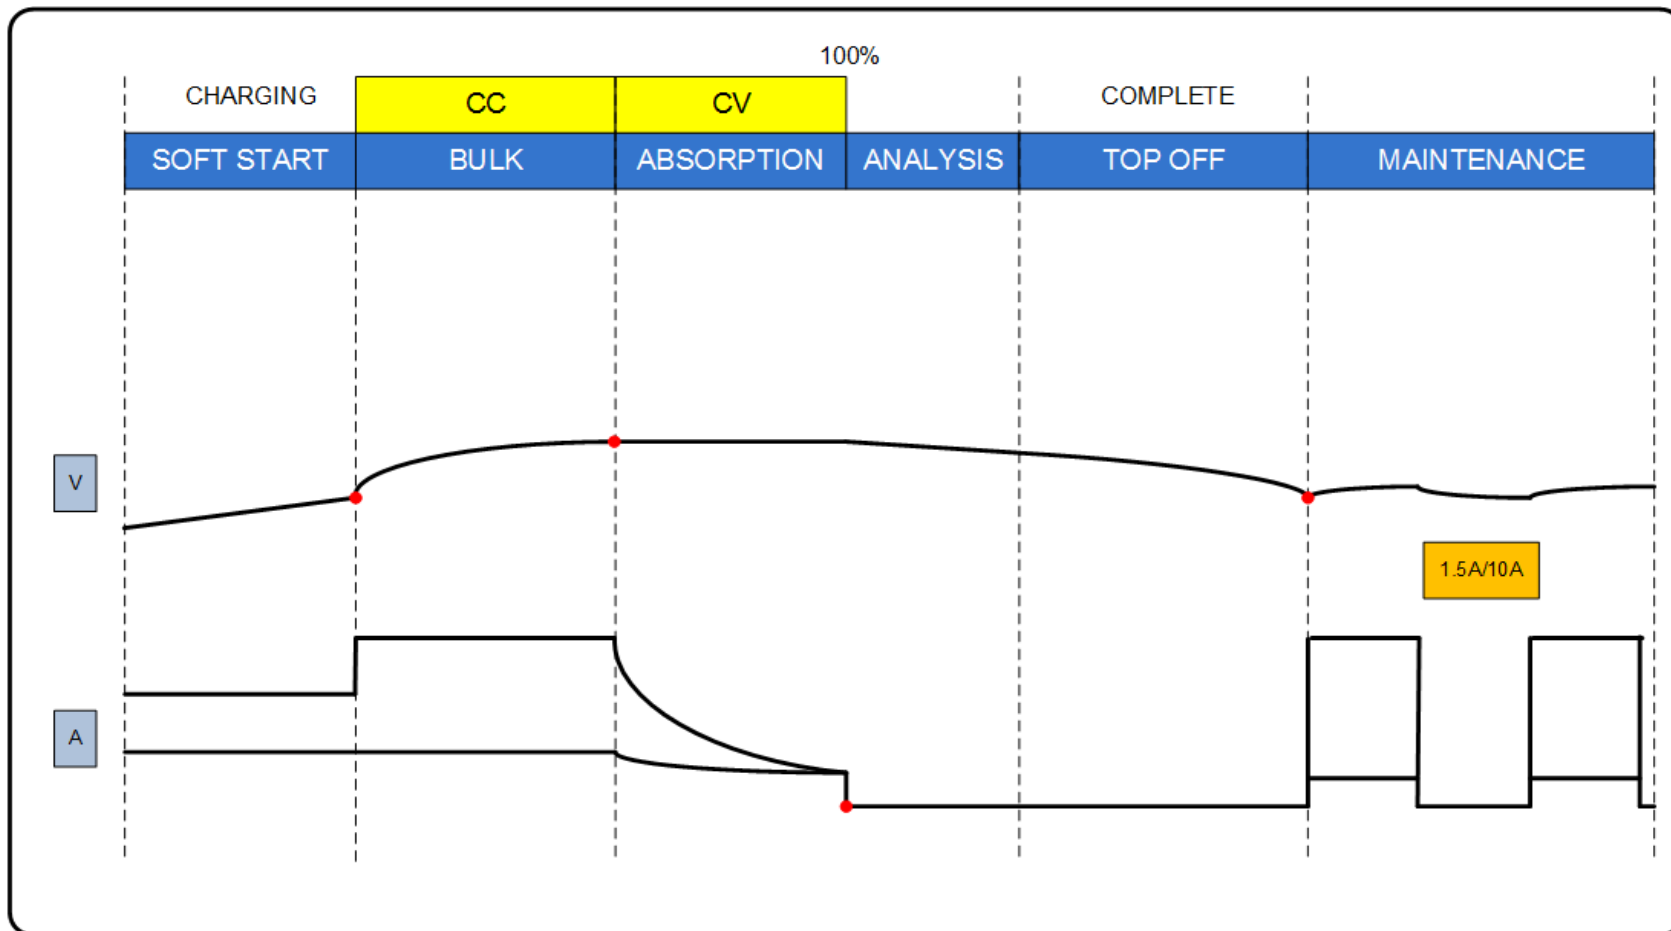

● **BaTExpert 100** is a fully automatic smart charger.

The microprocessor will charge/maintain a battery with the optimal setup:

- **Absorption**: When the battery reaches 75% charge, the charger output is constant with high voltage small current to 90% in a safe manner.
- **Pulse**: When the battery reaches 90% charge, the charger starts a charge pulse with a smaller current to fully charge in the safest manner.
- **Analysis** : Tests that the battery is retaining the charge that has been delivered.
- **Top off**: Fully charge the battery without overcharging the battery.
- **Maintenance**: Maintains the battery in a full state of charge.

- **BaTExpert 100** 6-stage Intelligent Switch Power Technology

Smart use, fully charge, and better care

BaTExpert 100

LiFePO4 Battery Charging Diagram (3/3)

- **BaTExpert 100**
- **is a fully automatic smart charger.**

The microprocessor will charge/maintain a battery with the optimal setup:

- **Soft start**: Tests that the battery is in suitable condition to receive a charge.
- **Fast Charge**: Charges battery to 75% in the fastest and most efficient manner.
- **Absorption**: When the battery reaches 75% charge, the charger output is constant with high voltage small current to 90% in a safe manner.
- **Analysis** : Tests that the battery is retaining the charge that has been delivered.
- **Top off**: Fully charge the battery without overcharging the battery.
- **Maintenance**: Maintains the battery in a full state of charge.

APPENDIX. BaTExpert 100 Selection Guide

Battery Size		Time to 80% Charged (Start from SOC=0%)	
Ampere Hours (AH)	Cold Cranking Amps (CCA)	BaTExpert 100 (1.5Amp)	BaTExpert 100 (10Amp)
2	40	1~2 hr	Not recommended
6	80	4 hrs	Not recommended
10	120	6~7 hrs	Not recommended
14	150	9~10 hrs	Not recommended
20	200	13~14 hrs	2 hrs
50	400	Maintenance	5 hrs
70	550	Maintenance	7 hrs
120	900	Maintenance	12 hrs
150	1170	Maintenance	15 hrs
200	1560	Maintenance	20 hrs
